01

Route Data

Record minimum depth, bottom type, current, obstacles, debris and vegetation.

02

Load & Duty

Define passengers, payload, operating frequency, speed expectation and route length.

03

Hull & Intake

Review hull clearance, intake exposure and the selected water conditions together.

04

Engine & Jet Package

Match hull, engine, jet pump and load before discussing performance.

05

Cleanout & Service

Confirm blockage access, maintenance process, parts and local service capability.

06

Local Review

Confirm destination rules, operating area, equipment, testing and documentation.
